AUGUST 2014 E-NEWSLETTER

NOT ALL REMEDIATION IS THE SAME: Improving the Environment for Sensitized Individuals - Part 1 of 2

There is a growing awareness that when certain individuals become ill from the contaminants in a water-damaged-building (WDB), their bodies develop sensitivity to those specific pollutants, as well as to other compounds. In such cases "normal" remediation or cleaning does not result in an environment that is helpful or acceptable to the client. With new studies showing that up to 25% of the population could be genetically susceptible to this type of exposure ailment, it is crucial for both restoration contractors and the impacted people to know how to approach such problems so that any remediation or ancillary cleaning has the best chance of success.

[Click here](#) to read the first of a 2-part article dealing with this new and important issue. Part 2 of the article will be in our next newsletter.

Another avenue for learning more about this increasing trend is to join us for a six-part webinar series, A Practical Approach to Assisting Sensitized Individuals, offered on Tuesdays and Thursdays during the month of August. The first webinar will be held at noon on August 12. [Click here](#) for full details.

Did You Know?

You may utilize the published articles on Wonder Makers' website as educational pieces for your clients. There are a variety of topics, from flooding to lead to chemicals to cleaning contents and many more. These resources have practical solutions that you may share. We ask that you alert us to your use of our articles, credit us as the source of the information, and we will be pleased to offer a limited release from the copyright.

Training Updates

Now is the time to prepare for the CMP. The Restoration Industry Association offers a Certified Mold Professional course only once a year. This year it will be held on October 28-30 in the Detroit Metro area. (Our host will be RIA's president, Scott Stamper!) So register now for the pre-requisite courses-Mold Remediation Technician and Mold Remediation Supervisor-so that you are ready for the CMP coursework.

Experienced individuals with previous mold remediation training may submit verification to the RIA and, if they qualify, move directly to the Supervisor class. A very experienced professional may even be allowed to challenge the Supervisor course test to avoid duplicating classes prior to the CMP course.

COMING SOON!
