MORE CERTIFICATIONS FOR YOUR MONEY - JANUARY 2014 E-NEWSLETTER

## Education is the Key

Many pundits have noted that we now live in an age where information is the key to success. This is true in every walk of life, even those where physical labor is necessary such as manufacturing, construction, restoration, and even such mundane tasks as cleaning. But as the world becomes awash with easily accessible sources it is the management of knowledge that becomes more critical. In other words, how do we sort important data from trivia and then use that material to understand the ramifications of the facts and make better decisions?

The simple answer to that question is education. As such, we continue to drive individuals, communities, and nations toward improving their educational offerings. At Wonder Makers, our team understands that trend and has worked diligently for 25 years to present the best education related to indoor environmental challenges. We strive to create training programs where the participants not only receive the important details in an understandable fashion, but where the details are presented within the framework of a "big picture". In this way, the students leave the programs with an understanding of how to use the information to improve both effectiveness and efficiency.

Recently, Wonder Makers was recognized by two very different groups for the quality of their training programs. The Indoor Air Quality Association (**IAQA**) conducted an extensive review of our Mold Remediation Technician program and granted Wonder Makers status as an IAQA-approved provider. Read more about the designation by following this link: [IAQA News](#)

In addition, our organization received extensive kudos from the Cleaning Industry Research Institute (**CIRI**) for the development of the certification training program for the Clean Standard K-12 and the presentation of the inaugural training class in Chicago on January 21 (follow these links for additional information related to this data driven standard that improves janitorial practices by utilizing ATP measurements to evaluate contamination levels following cleaning). Whether it is putting an entertaining new twist on existing programs such as an asbestos refresher class, or developing completely new educational resources such as the cleaning standard or a refresher course for trauma scene cleanup, Wonder Makers is the partner that you can trust to make sense out of the flood of information related to the indoor environment that we face every day. Call us and let us help you excel in your industry with one of our standard courses or a custom presentation designed to fit your specific needs.

## Did You Know?

**What do** Indoor Air Quality Association (**IAQA**), Restoration Industry Association (**RIA**), Cleaning Industry Research Institute (**CIRI**) all have in common? You can receive certifications through these organizations by attending courses presented by Wonder Makers Environmental. Click [here](#) for a schedule of upcoming classes

---

## **Sign Up Now for the Mold Refresher Course in Orlando, Florida**

Come up to speed on the latest developments in the mold remediation industry and renew your mold certificates for numerous organizations by attending the upcoming Mold Refresher course in Orlando. The class is scheduled for 8:30-4:30 on April 8 so that attendees can stay in town for the RIA convention. (This course is for refreshing your RIA certificates. It is not a State of Florida mold refresher class.)

## **Testimonial**

Regarding the first CIRI training class on the Clean Standard: K-12: "Course took a lot of material and concepts and presented it in an understandable way. It is so nice to have a course which deals with a technical issue that is as practical as this one."
