JUNE 2014 E-NEWSLETTER

## Remediation of Building Materials

The more we speak with contractors and clients around the country, the more we find that on many mold remediation projects, even the most basic of best practices are not being used. In fact, in many cases the contractor's work has made the client's situation worse! This usually happens not because these contractors are deliberately negligent, but rather, because they are uninformed. Even so, whatever the reason for substandard work, the contractor is still responsible and, in the worst cases, liable.

Remediating fungal contamination from building materials involves a number of steps that are widely accepted in the industry, and experience has determined that they should be performed in a particular order. Check out the Mold-Related Articles Page under the Education tab on our website to see this article with the basic steps that professionals need to take in order to protect themselves and their workers, and to conduct a successful mold clean-up project on the first try.

These three pages of information could save you a great deal of trouble and prevent costly mistakes that you may not even realize you or your employees are making.

## Did You Know?

Wonder Makers Environmental offers ON-SITE PROJECT COORDINATION services for asbestos removal, mold remediation, work that disturbs lead paint, and many other types of jobs. We can provide a knowledgeable person on your project site to help you understand and follow applicable regulations and standards of care, and to help solve tricky problems that come up. This is especially important on jobs that are somewhat out of the ordinary. Ben Franklin's wise words are still relevant: "An ounce of prevention is worth a pound of cure."

Call Wonder Makers to help you get your project completed successfully and quickly, while keeping an eye out for rules and regulations that apply.

## Case Evaluations

Wonder Makers works with people across the country whose health has been impacted by contaminants found in the buildings they occupy. We offer Case Evaluations, conducted by phone, to help these people identify their specific problems and sort through available options. Our trained team then helps to develop a clear and logical plan of action to resolve the issues in that particular home or workplace. Check out our webpage at <http://www.wondermakers.com/Services/CaseEvaluations> for details about this service

Customer Testimonial: "Thanks again for all of your assistance. We would be floundering otherwise."

## TRAINING SCHEDULE
