

WONDER MAKERS ENVIRONMENTAL

MARCH 2016 E-NEWSLETTER

FAQ About Cleaning Transport Systems - HVAC Decontamination

For many years Wonder Makers has been following the research (as well as contributing some important studies) in regards to sensitized individuals. Our interest in and assistance to people who are suffering long-term effects from exposure to water-damaged buildings, mold, bacteria, and chemicals has brought us recognition from many parts of the world. In an effort to support impacted individuals, their families, and the contractors that are necessary to help them correct some problems, Wonder Makers has compiled answers to a number of frequently asked questions related to this specific subset of the restoration industry. This month we offer information about cleaning heating, ventilation, and air conditioning (HVAC) systems. Please contact us if you would like copies of earlier FAQs related to:

- Water-damaged buildings
- Source removal
- Cleaning contents
- Whole structure cleaning
