MAY 2012 E-NEWSLETTER

Get Ready! New Training Regulations Are on Their Way

If you are not already familiar with the acronyms GHS and ICRA, then you had better designate this newsletter as a high priority read. The terms Globally Harmonized System (GHS) and Infection Control Risk Assessment (ICRA) will be getting much attention from regulators, business owners, and property managers over the next two years as sweeping changes and recommendations come into play.

Synopsis: Every organization will be required to provide workers with new training about chemicals; and companies that work in hospitals or other healthcare facilities are being forced to provide infection control training to all workers on site.

Read the complete article entitled "Get Ready – GHS & ICRA Training" on our website at this address: <http://www.wondermakers.com/Education/Articles>

Did You Know?

All employers will be required by OSHA to provide their workers with training by December 1, 2013, on new labeling requirements for chemicals and a new safety data sheet (formerly known as material safety data sheet) format.

All contractors working in healthcare facilities may need to provide their workers with infection control training. The Joint Commission (previously known as Joint Commission for the Accreditation of Healthcare Operations) now instructs healthcare facilities to ensure that contractors working in their properties be familiar with Infection Control Risk Assessment (ICRA). Healthcare facility managers are adding requirements for ICRA training to their bid documents and requesting proof of training for all personnel.

For more information read the above-mentioned article: **"Get Ready – GHS & ICRA Training" on our website at this address: <http://www.wondermakers.com/Education/Articles>**

Asbestos Bulk Sampler w/Carrying Case

The safest, most efficient way to collect bulk samples.

- Includes: Rugged carrying case with fold-down handle and positive grip latch, two handles, two plungers and 100 cutter sleeves in clear, slim vials with caps.
- Removable cutter eliminates field decon and cross contamination problems
- Small bore reduces fiber release for safer sampling
- Lightweight and compact for easy transport
- Complete with rugged carrying case and detailed instructions

- Double-length cutters available for extra-deep samples
- Optional power driver encourages full depth sampling for increased accuracy

Our Price: \$ 285.00
